RG 87 Entry A1 6 Field Agents' Reports and Related Correspondence.

Link to general background for RG 87: https://catalog.archives.gov/id/2669418

All of the original report documents have been destroyed; however, everything was microfilmed prior to destruction. The microfilm has been digitized, but unfortunately some of it is not easy to read. The digitized microfilm is arranged by each agent's name and then chronologically, which means that unless you know the name of the agent involved, you'll have to check a specific time period for each agent. There are 117 pages of digitized microfilm, so there are a lot of agents to check. There is no index and only a spreadsheet as a finding aid.

Microfilm and Excel spreadsheet courtesy National Archives and Records Administration, College Park, Md.
